

Heat-Flo

HEATING PRODUCTS

Do you know.....Heat-Flo?

Heat Flo stainless steel tanks are your best choice for:

- Indirect hot water tanks
- Buffer Tanks
- Solar tanks
- Storage Tanks

These great tanks continue to get better!

- ** New and improved insulation 2 ¼ inches of EPS foam around the entire tank including below for the lowest standby loss
- ** Entire tank is 316 L stainless steel
- ** ABS outer jacket for high resistance to denting and scratching

** Unique top rough in for all connections.

** 4 x "8" rough in. No matter what size tank, the connections are all 8" center to center. No more guess work!

** All tanks have the right sized T & P relief factory installed with tape and pipe dope

** All tanks have quarter turn boiler drain factory installed with tape and pipe dope.

**** All tanks have a stainless steel dip tube for high draw down rates**

**** All tanks have smooth stainless steel coils for high performance.**

**** All tanks have long length coils (at least 21 feet of 1" stainless)**
(many manufacturers use finned coils which can clog with lime or scale for diminished performance over time)

**** Honest performance data** *(many manufacturers list dramatic first hour ratings that require oversized boilers or pumps to make themselves look better)*

**** The 40 gallon tank is available in a Silver or Red outer jacket**

**** Low boy tanks.**
The 40 gallon lowboy is only 36" high!

**** Stainless Steel Solar tanks with electrical back up elements**

**** Buffer tanks available with multiple stainless coils**

The more you know, the more you'll like Heat-Flo
